Key operational responsibilities

As a Senior System Engineer at Worldline you are a part of Worldlines Nordics Payment Monitoring Systems team, responsible for operating, monitoring and supporting our applications as well as the underlying databases. You will participate and drive internal projects to supply requirements from an operational perspective. You will discover, automate and monitor IT processes with an eye to flexibility, best practices, high performance and continuous improvement. You will also identify limitations and problems within payments platform that complicates the work for other roles within the CSO department, prioritize them and implement solutions and/or gather the necessary resources to address it.

We believe in team ownership of services and features all the way from idea to production. Engaging with others to solve complex problems is natural for you and you really want to make a difference.

Key skills required

We believe you have:

- Bachelor's degree in computer science or equivalent education within relevant area
- Knowledge of and experience from working with monitoring tools as Zabbix or OP5/Nagios.
- Knowledge of and experience with search based data management tools such as Splunk or ELK stack (Elastic Search/LogStash/Kibana)
- 5+ years of experience as a system administrator of Unix/Linux environments
- Experience in NoSQL, Cassandra and/or DB2 and general usage
- Excellent written and verbal language skills in English is required, including the ability to communicate clearly and efficiently with others.

- Experience as a project leader for a team while working hands-on
- Experience in writing technical documentation

Personal Skills

As a person you are dedicated, enterprising and come with a positive outlook, energy and attitude that everything is possible. (the impossible just takes a little more time)

We insist that you have a passion for what you do and that you have constant drive and curiosity for learning new things and we expect you to, just as important, help others improve as well.

You will work from our truly global office in Stockholm. We are proud to foster a workplace free from discrimination.
